MK Seats GmbH
Brunnenstraße 29 B
59494 Soest

hat die Präqualifikation in den nachfolgend genannten Warengruppen erfolgreich abgeschlossen und ist mit dem folgenden Status präqualifiziert:

Polster- und Polsteraufarbeitung: Präqualifiziert

Die Präqualifikation ist gültig bis zum: 18.02.2028

PREMIUM-COMFORT
ONBOARD

The Scorpius XXL VDE is a fully electric captain's chair designed for the most demanding marine environments. Perfect for luxury yachts – combining advanced functionality, elegant aesthetics, and top-tier ergonomics.

- Electrically adjustable footrest (100 mm range)
- Electrically height-adjustable base (100–200 mm range)
- Electrically controlled rotation mechanism
- Electric floor rail – integrated into the vessel's deck
- Electrically adjustable backrest and seat slide
- Lumbar support for ergonomic posture
- Multifunctional armrests with integrated controls
- Premium natural leather upholstery
- Custom branding available – add your logo

HELMSMAN'S SEAT
PATROL

Captain's Chair with Integrated Headrest. A highly durable and widely used captain's chair suitable for almost any application. The sporty design of the chair provides full ergonomics and seating comfort, and the mechanical suspension can be individually adjusted to the user's body weight.

Equipment:

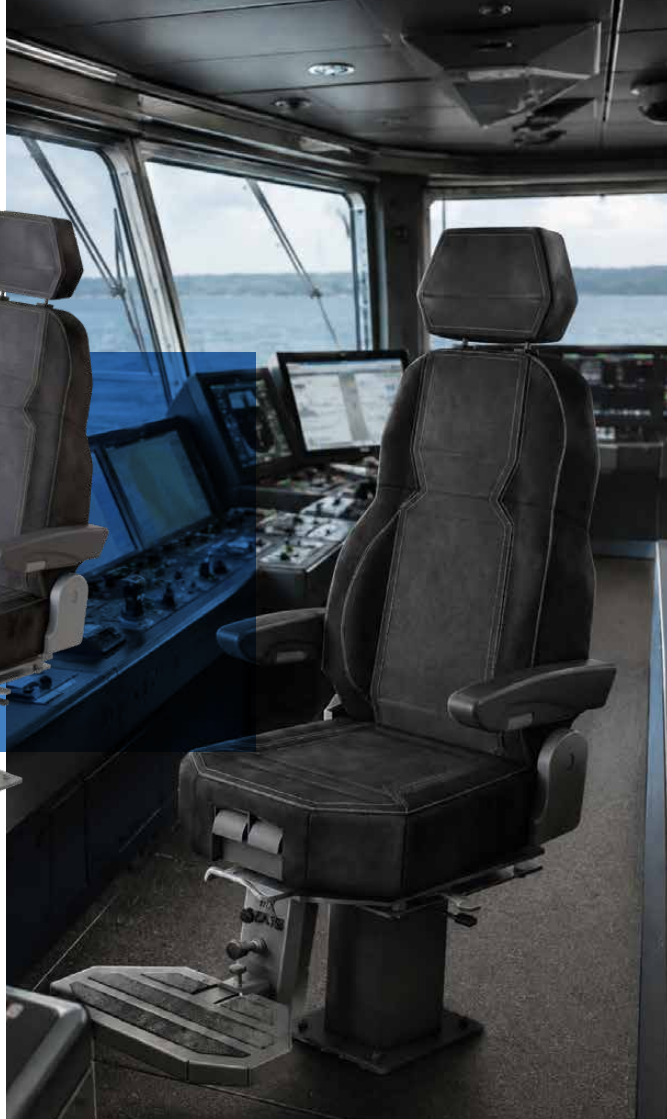
- Adjustable mechanical suspension
- Integrated headrest
- Adjustable armrests with the possibility of complete folding
- 360° swivel mechanism
- Height and tilt adjustment of the chair
- Lumbar adjustment
- Dual-plane adjustment
- Adjustable aluminum base
- Upholstery: fabric or leather

HELMSMAN SEAT
DRAGON

Ergonomic boat captain's chair with integrated headrest. The chair is designed for cabins where space for a standard captain's chair is limited. Its sporty design ensures full ergonomic support and comfortable seating, and the static chair can be individually adjusted to fit tight workspaces.

Features:

- Adjustable 160 mm aluminum base (Standard)
- Adjustable footrest
- 360° swivel mechanism
- Seat longitudinal adjustment
- Seat tilt adjustment
- Adjustable armrests with the option of full folding
- Lumbar adjustment
- Adjustable headrest
- Standard upholstery: faux leather



HELMSMAN'S SEAT
ATLANTIC

Captain's Chair with Integrated Headrest. A highly durable and widely used captain's chair suitable for almost any application. The sporty design of the chair provides full ergonomics and seating comfort, and the mechanical suspension can be individually adjusted to the user's body weight.

Equipment:

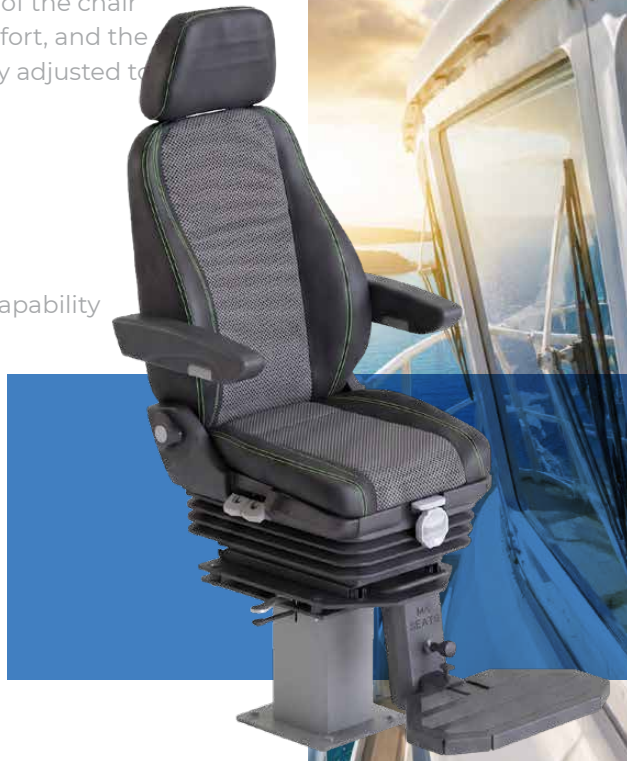
- Adjustable mechanical suspension
- Integrated headrest
- Adjustable armrests with the possibility of complete folding
- 360° swivel mechanism
- Height and tilt adjustment of the chair
- Lumbar adjustment
- Dual-plane adjustment
- Adjustable aluminum base

HELMSMAN SEAT
CALYPSO

Captain's Chair with Integrated Headrest. A highly durable and widely used captain's chair suitable for almost any application. The sporty design of the chair provides full ergonomics and seating comfort, and the mechanical suspension can be individually adjusted to the user's body weight.

Equipment:

- Adjustable mechanical suspension
- Adjustable headrest
- Adjustable armrests with full folding capability
- 360° swivel mechanism
- Seat height and tilt adjustment
- Seat slide adjustment
- Lumbar adjustment
- Dual-plane adjustment
- Adjustable aluminum base
- Upholstery: fabric or leather



SCORPIUS XXL

Captain's chair with a built-in ship management and control system. All parts – from the headrest, backrest, seat and footrest to the overall seat height – are fully electrically adjustable, allowing complete customization and true seating comfort. The chair also rotates 360 degrees electrically.

Mounted on a column attached to a sliding rail – moving sideways or fore-and-aft – available in 1.2 or 1.5 metre lengths.

The chair can be additionally equipped with monitors, joysticks, CAN communication and other devices from external suppliers. Various colors and finishing materials are available.

HELMSMAN SEAT
MAGNUM

Standing a watch means sitting for a long time. The MKM Magnum is our seat for the bridge and the helm station: a high, contoured backrest with a pronounced shoulder area, a generous seat cushion, and a range of adjustment that sets the seat to the person – not the other way round.

360 degrees – the view follows the operator
The rotary mechanism turns freely through the full circle. From the helm to the chart table to the view astern, without getting up. A fore-and-aft adjustment lets you set the distance to the console precisely.

A gas spring instead of cranking
Height is set by gas spring – one movement and the seat sits where it should. The backrest is recline-adjustable, and the armrests fold up individually and adjust for angle. The footrest adjusts for height and angle and swings with the seat as it turns.

Your color, your upholstery
Upholstery in fabric, artificial leather or leather; the Magnum fits the bridge interior instead of standing out from it. Numerous options for having company branding via logo placement.

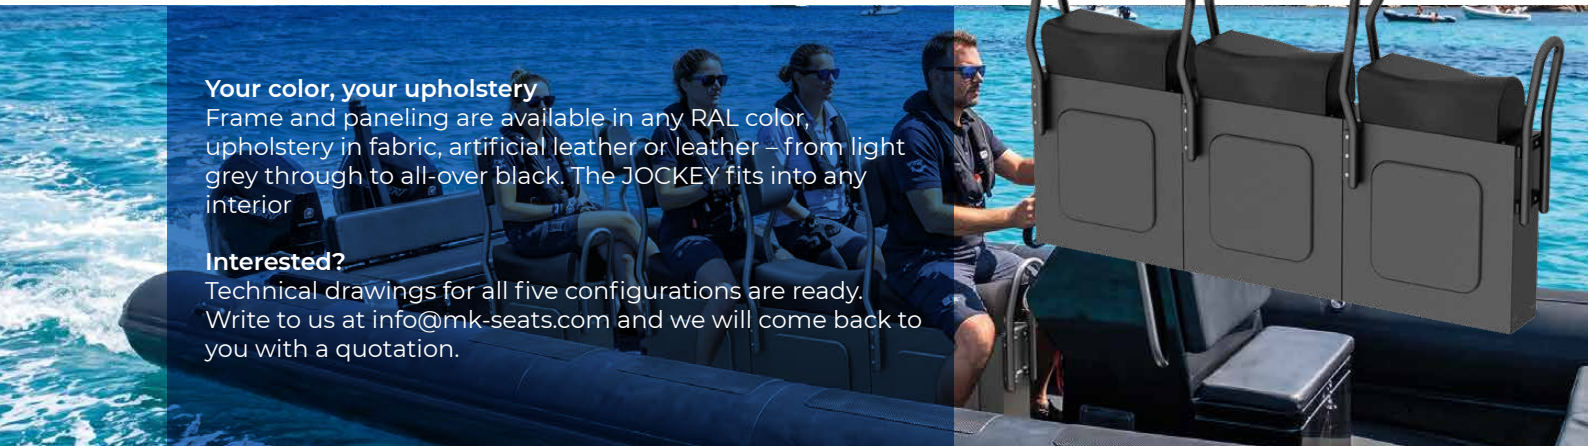
The technical drawing and equipment options are available. Write to us at info@mk-seats.com and we will come back to you with a quotation

JOCKEY

When space is tight but nobody should have to stand: the JOCKEY is our answer to narrow vehicle interiors. A slim seat with a clean silhouette, built on a sturdy tubular frame with an integrated grab handle – and at just 269 mm deep, compact enough to keep the aisle clear.

Modular from 1 to 5 seats
The JOCKEY comes in five configurations – from a single seat to a five-seat bench.

Light, slim, built to last
Around 15 kg per seat – every kilo saved feeds straight into fuel consumption and payload. The welded frame is manufactured to EN ISO 13920 Class B, with general tolerances to ISO 2768-1 m. Seat and backrest cushions are contoured, and the side panels feature a maintenance access opening.



Your color, your upholstery
Frame and paneling are available in any RAL color, upholstery in fabric, artificial leather or leather – from light grey through to all-over black. The JOCKEY fits into any interior

Interested?
Technical drawings for all five configurations are ready. Write to us at info@mk-seats.com and we will come back to you with a quotation.

JOCKEY SPX

Where long shifts meet uneven ground, the seat decides how the working day goes. The Jockey SPX is our single seat for exactly those conditions: a high backrest, contoured cushioning and a scissor suspension with coil spring that absorbs shocks before they reach the driver.

Suspension that does the work
The heart of the seat sits beneath the cushion: a scissor mechanism on a solid pedestal, guided by a central coil spring. The design keeps the seat tracking straight instead of letting it break away sideways – and stays accessible from the outside for maintenance and spring adjustment.

Compact despite the comfort
The pedestal measures just 465 x 285 mm, so the Jockey SPX fits where conventional operator and helm seats no longer do.

Built to grab hold of
Grab handles on both sides of the backrest frame make getting in and out easier and provide support when the ride gets rough. Manufactured as a welded structure to EN ISO 13920 Class B, with general tolerances to ISO 2768-1 m. Frame and pedestal in any RAL color, upholstery to your specification.

Interested?
The technical drawing is available. Write to us at info@mk-seats.com and we will come back to you with a quotation.
